READING THE SHOP LABELS

Shop number — Short span x long span

12
10'0"
x 27'6"

Example format only. A shop label uses feet and inches. All values are approximate internal enclosing spans, shown short side first.

01 MEASUREMENTS

Sizes are derived from the supplied vector PDF at its declared 1:150 scale. They represent the largest internal spans, not a certified area or a frontage measurement.

02 IRREGULAR OUTLINES

An asterisk and warm fill identify pronounced tapered or irregular shops. Their spans enclose the outline; recesses and column projections can reduce usable space.

03 SOURCE CHECK

The 33.06 m, 28.53 m and 53.76 m edges agree with the scale. The edge labelled 36.00 m measures about 36.73 m at that scale and needs drawing-author confirmation.
